Phil, I checked with our Site Investigation Section regarding the Kitchen Kompact Site. They won't be turning it into a Superfund Site, They won't even do any more investigation on it. The decision was made that it is a Federal Site so it will be given a No Further Action Planned designation. It hasn't shown up in the CERCLIS yet because they are moving to a new Database. I might suggest that you contact Erika Ault if you have specific questions about the designation. Or to discuss what you know vs what she does. I would say that it will likely be investigated under another Federal Program, Possibly DERP. But with the information we know now there is a different smoking gun for the contaminant.
